

The original
FLEXITEEK
is back

Flexiteek, the European market leader of synthetic marine decking is back in Australia with its next generation 2G decking designs. Flexiteek is cooler than real teak.

We want people in the marine industry with hands-on experience to help re-establish Flexiteek around Australia.

Opportunities exist for agents in all mainland states to sell, measure and install Flexiteek decks that will be expertly made in Queensland by the authorised Australian distributor.
