

Just feel it!

FLEXITEEK

THE NEXT GENERATION

YOU CAN'T SEE IT - JUST FEEL IT

We asked ourselves: - Is it possible to make composite decking that is cooler and lighter? And after many ideas and tests we have a new material that solves these issues.

Flexiteek proudly presents:

FLEXITEEK 2G™

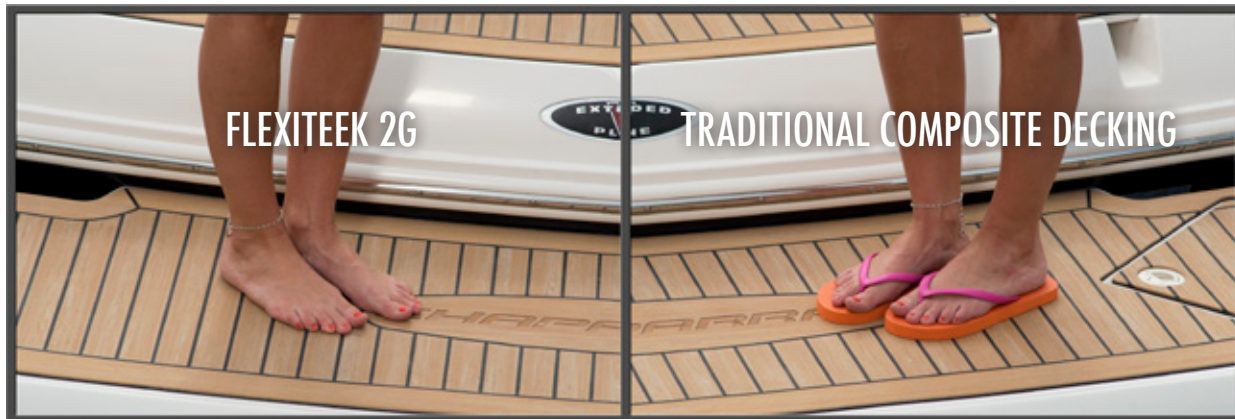

Patent Pending

It looks the same but you will feel the difference, the surface cools off 30% faster than traditional composite decking. The new Flexiteek 2G material has an enhanced thermal performance as well as reduced weight.

The outstanding heat reflecting properties have been designed to reduce the thermal transfer so that the synthetic decking feels more like walking on natural wood without shoes!

The 35% weight saving will be of special interest to owners of Catamarans, Performance yachts and Power boats. All the benefits from our first generation of world leading synthetic decking are kept, we've just made it even better!

The material is fully recyclable and is made using REACH compliant phthalate free plasticizer.

We take the art of deck design and manufacture very seriously, after all it showcases our product. All our manufacturers are trained to the highest levels and are highly skilled in their art. Don't be fooled by copies of our product, if it's not a beautifully crafted deck then it's not Flexiteek.

All our decks are custom made and therefore manufactured to your requirements. We've built decks for the smallest tenders to Super Yachts, we've met the highest standards expected by the owners of these boats...

FLEXITEEK IS DIFFERENT

Leopard Catamarans 51 PC
with Flexiteek Bleached.

LESS MAINTENANCE - MORE BOATING

ANTI-SKID PERFORMANCE

Excellent non-slip surface. Wet or dry, Flexiteek provides amazing grip in the toughest conditions.

LOW MAINTENANCE

Clean with soap and water, or use a high pressure washer.

TRIMS

Flexiteek trims can be combined with other Flexiteek decking products to provide a perfect finish for that uniform Flexiteek look.

DESIGN

Flexiteek can be designed without boundaries.

Tenderline Gentleman 34
with Flexiteek Scrubbed.

BENEFITS OF HAVING A FLEXITEEK DECK:

Flexiteek is the original synthetic marine decking and a patented product worldwide.

- Flexiteek is the market leader of synthetic marine decking.
- Flexiteek does not require sealing or difficult ongoing maintenance.
- Excellent non-slip surface. Wet or dry, Flexiteek provides amazing grip in the toughest conditions.
- Flexiteek retains its color and look, it doesn't fade like teak.
- Stain resistant, soap and water will remove most spills easy (oil, fuel, red wine, fish blood etc).
- UV tested and proven UV resistant.
- Welded system without glued joints which provides a deck that is waterproof.
- No screw holes- Flexiteek and the adhesive will work as a sandwich construction on your boat.
- Reduces sound and noise by up to 11 db.
- Low combustibility.
- Flexiteek comes with a 5 year material guarantee.
- All Flexiteek products are recyclable.
- Flexiteek has earned the respect of boat manufacturers for its high quality. Check out our webpage for more information on our reference section.

DECKING FOR BOTH TRADITIONAL AND MODERN BOAT DESIGN

When you order Flexiteek as your decking material we will design it to fit your boat – the way you want it. Just contact your nearest distributor for a quote on your boat type. Flexiteek is sold by over 100 distributors in 38 countries around the world and that provides you with a worldwide support and service network.

FLEXITEEK STAYS THE COLOR YOU CHOOSE

Flexiteek comes in the same colors to mimic teak, however unlike teak Flexiteek stays the color you choose without the scrubbing and endless maintenance.

But we are not restricted by nature! How about a black plank? For your modern RIB or a white plank for your heads or, even, your bathroom at home...

Flexiteek colors: Scrubbed, Weathered, Bleached, Carbon, Off-White, Teak

For a full overview of the Flexiteek colors and caulk line color combinations, please visit: flexiteek.com/products

Beneteau 40 with Flexiteek Scrubbed.

Clean with a high pressure washer.

Flexiteek provides amazing grip in the toughest conditions.

TRIMS

Flexiteek trims can be combined with other Flexiteek decking products to provide a perfect finish for that uniform Flexiteek look for internal cabin design and external deck installations.

The various trim profiles are made of PVC to look and feel like real wood. They are durable, resistant to water and will not crack or fade like real teak and now they come in a choice of colors: Teak, Weathered, Bleached and Scrubbed.

RUBBING RAIL 65 MM

This 65mm x 20mm product is available in a 10m coil. As well as a rubbing rail, this versatile section can be used for other applications.

RUBBING RAIL 100 MM

This 100mm x 20mm product is available in a 10m coil. As well as a rubbing rail, this versatile section can be used for other applications.

NOSING SECTION

The 40mm x 20mm nosing section can be used as an edging product for steps or furniture. It comes in a 10m coil.

TOE RAIL

The 34 x 40mm toe rail section is made in standard 2.4m lengths (weight c. 1.2kg per meter). A 10mm diameter plug section is available to fill in the screw holes after installation.

U-SECTION

The U-shaped edging sections come in two sizes 14mm and 17mm. They can be used for more solid edgings or trims where a wood effect surround is required.

T-SECTION

The T-sections are 19mm and 25mm wide and can be used for trimming.

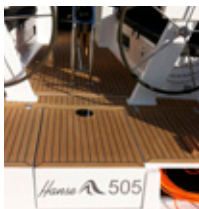

ANGLE-SECTION

Angle-Section 60mm x 50mm which has numerous uses from step edges to disguising hatch edges or as part of a capping rail trim etc.

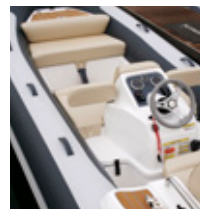

OUR CLIENTS SAY

“Our aim is to fulfill our customer needs, providing them with the highest standard of equipment whilst offering a sustainable product at the same time. With Flexiteek we found the perfect partner to do just that.”

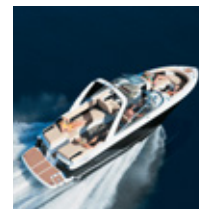

Arne Amann – Head of Purchasing
Hanse Yachts

“Williams choose to fit Flexiteek as it is by far the most realistic teak substitute currently available. We have fitted the product to several thousand boats used in locations ranging from Australia to Norway and have found it to perform most reliably.”

John Hornsby – Joint Managing Director
Williams Performance Tenders

“We have been partnering with Flexiteek since early 2007. The reason for this long relationship is that Flexiteek is quite simply the best PVC synthetic decking available. The new colors that they recently released look as close to real teak as you can get, and the service is second to none.”

Pat Wiesner – V.P. of Engineering
Regal Marine
