

FLEXITEEK

AUSTRALIA

There is no deck so small, so large or so complicated that Flexiteek cannot provide a meticulously fitted, fashionable solution.

- *Decks designed and manufactured in Australia by the only company with exclusive Australian distributorship rights*
- *Strict quality control*
- *Genuine Swedish technology*
- *Trusted by world's leading boat makers*

*Flexiteek
is a great product,
but it is only as good as
the skills of the designer
and manufacturer.*

Only Flexiteek decks, manufactured in Australia, can guarantee accurate colour matching, attractive design and fault-free manufacture.

Flexiteek comes from the European factory in rolls and each batch must be checked for slight colour variations. Boxes from the same batch are checked first, followed by a visual inspection on the assembly bench to ensure that there are no colour variations, like the rejected samples shown.

Flexiteek is an ideal, long term, low maintenance solution for pontoons, balconies, bathrooms, pool surrounds and even the bar.

- *New generation deck designs*
- *Big colour and caulking choices*
- *Easy maintenance*
- *Non-slip surface*
- *Stain resistant (red wine, blood)*
- *Can be water-pressure cleaned*
- *Low sound and noise*
- *Retains colour*
- *Cool to walk on*
- *Looks and feels like timber*
- *Can be sanded like timber*

FLEXITEEK
AUSTRALIA

*Support Australian
industry.*

A perfectly finished Flexiteek deck is a combination of raw product and meticulous templating, manufacturing and installation.

Flexiteek planks are ultra sonic and hand heat welded together to form an extremely strong and watertight joint. No glues are used in manufacturing.

The result is a deck that is waterproof, with no screw holes. Flexiteek costs less than conventional decking systems.
